REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art while teaching several of the additives of the present invention as corrosion inhibitors, fail to teach the brines at the level of at least 11 lbs/gal, or in combination with the mole ratio of the cation and additive. Patents such as US 6620338, US 4101441 and US 3770055 teach weak brines. The Arai, Journal of Food science reference submitted by applicant teaches a brine level of calcium chloride at 20%, which is far below the level for an 11 lb/gal density. Edmunds (US 2319668) teaches heavy brines, but teaches an amount of additive well below the current claim requirements. The overall prior art thus does not specifically teach or suggest the current invention to one of ordinary skill in the art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Philip C. Tucker whose telephone number is 571-272-1095. The examiner can normally be reached on Monday - Friday, Flexible schedule.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Randy Gulakowski can be reached on 571-272-1302. The fax phone
